Subject index

α-(BEDT–TTF)$_2$I$_3$ 494, 498
α-(BEDT–TTF)$_2$MHg(SCN)$_4$ 489
α-(BEDT–TTF)$_2$KHg(SCN)$_4$ 508
Absorption spectra 137
Acceptor state 115
Aharonov–Bohm effect 398
Aharonov–Bohm flux 365
AlAs 178
AlAs/GaAs/AlAs 285
AlGaAs/GaAs/AlGaAs 250
Amplitude of the magnetoconductivity peak 206
Anderson transition 26
Angular dependent magnetoresistance resonance 481
Anomalous magnetoresistance 498
Anticrossing 277
Antidot structure 398
Antiferromagnetic exchange interaction 422
Ar ion bombardment 184
Auger recombination 445

β''-(BEDT–TTF)$_2$AuBr$_2$ 508
β''-(ET)$_2$AuBr$_2$ 470
Base current 254
Binding energy 132, 417
Broken-gap system 259

$(C_6H_{13}NH_3)_2PbI_4$ 132
$(CdZnMn)_3As_2$ 451
Camel's back structure 178, 285
Canted arrangement 470
Capacitance measurement 236
Capacitance spectroscopy 378
Capture cross section 128
Carcinotron 465
CdCoSe 441
CdTe 226
CdTe/CdMnTe 422, 455, 460
Charge build-up 250
Charge density wave 327, 332
Charge density wave state 86
Coherent current 263
Collector current 254
Compensated quantum Hall plateau 202
Conductance fluctuation 351, 355, 361
Corbino device 1
Coupled quantum well 106
Coupled δ-layers 221
Critical exponent 26
Crossed-gap heterostructure 202
Crossed-gap superlattice 268
$CuInSe_2$ 229
Cyclotron resonance 141, 149, 154, 168, 173, 178, 268, 289, 394, 432, 465

δ-doped quantum well 241
δ-layer 221, 298
Δ_3-statistic 306
D^- center 417
D^- ion 409
De Haas–van Alphen effect 508
Delocalisation 455
Density of states 293, 310
Depinning 327
Device width 17
Devil's staircase 503
Diamagnetic shift 119, 441
Diamond 137, 178
Dielectric constant 236
Diluted magnetic semiconductor 422, 441, 445, 455
Diophantine equation 30
Donor–acceptor recombination 164
Doped semiconductor 236
Double pulsed field 522
Double quantum well structure 91
Double-barrier resonant tunneling 241
Double-barrier resonant-tunneling device 250
Double-layer FQH system 91
Double-layer electron system 43

(ET)$_2$Cu(SCN)$_2$ 470
(ET)$_2$KHg(SCN)$_4$ 470
EL2 defect 403
Edge current 1, 17, 21, 369
Edge state 1, 7, 17, 192
Effective mass 159, 164, 178, 226, 229
Electron–bound hole recombination 51, 128
Electron–electron interaction 76, 314, 385, 409, 470

Electron–phonon interaction 289
Electronic state 298
Energy level statistic 306
Envelope-function calculation 285
Exciton 455, 460
Excitonic spectrum 132
Extreme quantum limit 56

FIR magneto-transmission 409
Far-infrared magneto-optical property 100
Fermi surface 232, 508
Fibre-reinforced coil 513
Field-induced spin density wave 503
Flux creep 522
Focused-ion beam 192
Fractional gap 51
Frequency dependence 327

Γ–X crossover 111
g^* factor 229
GaAs 221, 298, 341, 369, 403
GaAs/AlAs 100, 119, 246, 289
GaAs/AlGaAs 1, 7, 17, 21, 38, 43, 51, 56, 72, 81, 111, 149, 159, 192, 206, 216, 241, 263, 277, 293, 314, 351, 378, 398
GaAs/GaInAs/GaAlAs 211
GaAsP 164
GaInAs/InP 76
GaInSb/GaSb 106
GaSb/InAs 202
Ge 141
Glass-fibre coil 513
Graphite 327, 332
Ground state 86, 385

HEMT 378
Hall effect 211
Hamiltonian nonseparability 263
Harmonic transition 168
Heavily doped superlattice 293
Heterojunction 149, 197, 206, 314
Heterostructure 211, 216, 263
HgCdMnTe 445
HgSe:Fe 432, 465
High magnetic field 526
High-T_c superconductor 522
Hopping 298
Hot-electron transistor 254
Hot-wall technique 173

$\boldsymbol{k} \cdot \boldsymbol{p}$ theory 159, 173
$2k_F$-type instability 332

I–V characteristic 259
Impact ionization 141
Impurity-related transition 465
InAlAs/InGaAs 254
InAs/GaSb 168, 268
InAs/GaSb/InAs 259
InAsSb/InSb 184
InGaSb/GaSb 154
InP 236
InSb 123, 128
In-plane energy dispersion 285
In-plane-gate 192
Incommensurate SDW 498
Incompressible Fermi liquid 38
Incompressible quantum liquid 66
Inhomogeneity 206
Interband magneto-optical property 106
Interband transition 168
Interface optical phonon 289
Interlayer Coulomb interaction 43
Interplay of magnetic and electric field 310
Intersubband scattering 216
Ionization energy 178

LPE 445
Landau emission 123
Landau ladder 277
Landau level quantization 337
Landauer's formula 361
Landé g^* factor 81
Lateral surface superlattice 398
Lattice commensurability 503
Laughlin state 86
Linear response approximation 197
Liquid–solid transition 56
Localization 306, 403
Localization length 26, 72, 355
Long-range correlation 403
Low-mobility semiconductor 178

MBE 226, 460
MOCVD 268
MOVPE 106
Magic angular momentum 385
Magnetic interaction 508
Magnetic phase transition 489
Magnetic-field-induced saddle point 111
Magnetization 318, 441, 451, 489
Magneto-absorption 132
Magneto-optical absorption 289
Magneto-optical spectra 111
Magneto-optical study 422, 470

Magneto-photoconductivity 409
Magneto-transport 298
Magneto-transport study 470
Magnetocapacitance 323
Magnetoconductance fluctuation 374
Magnetooptics 403
Magnetophonon resonance oscillation 445
Magnetopolaron 394
Magnetoreflectance spectra 441
Magnetoresistance 197, 268, 293, 327, 332, 374, 489, 494
Magnetotransport 192, 202, 232, 246
Magnetotunneling 250
Many-body effect 115
Mesa-etching 374
Mesoscopic system 355, 365, 398
Metal–insulator transition 72, 314, 498
Metal–nonmetal transition 494
Miniband transport 293
Mixed phase 149
Mixed-valence regime 432
Mn–Mn cluster 422
Mn–Mn interaction 451
Mobility 216, 221
Mobility edge 26
Multi quantum well 119
Multilayer electron system 43
Multiple quantum well 460

n^+–n–n^+ sandwich structure 374
NV center 137
Narrow channel 86
Narrow-gap semiconductor 123, 184, 432, 445
Natural quantum-well system 132
Negative density of state 314
Negative dielectric permittivity 323
Negative differential conductivity 259
Negative differential velocity 246
Nonequilibrium carrier distribution 123
Nonequilibrium electron distribution 7
Nonlinear effects 7
Nonlocal magnetoresistance 341
Nonlocal oscillation 341
Nonlocal resistance 7, 21

One-dimensional coupled quantum box structure 293
Open Fermi surface 470
Open orbit 481
Opening of the bandgap 465
Optical Shubnikov–de Haas effect 432
Optically detected cyclotron resonance 141, 159, 164
Organic conductor 470, 481, 489, 494, 498, 503, 508

Parabolic quantum well 318
Parabolically graded quantum well 100
Paramagnetic quantum oscillation 481
PbSe 173
PbTe 173
Perpendicular transport 246
Phase coherence length 34
Photoconductivity 106
Photocurrent spectra 277
Photoluminescence 38, 56, 115, 128, 141, 159, 184, 455, 460
Photoluminescence excitation spectroscopy 119
Photoluminescence spectrum 51
Piezoelectric effect 268
Piezoelectric field 154
Plasma-shifted cyclotron resonance 100
Plateau width 17
Polaron 417
Pressure dependence 489
Pulsed magnetic fields 111, 132, 137, 168, 173, 178, 202, 211, 229, 232, 250, 254, 259, 268, 293, 327, 332, 369, 432, 451, 460, 465, 470, 481, 513, 522
Pulsed-field coil 513

Quantized Hall device 7
Quantum Hall conduction 365
Quantum Hall effect 1, 17, 26, 30, 34, 369
Quantum Hall effect (fractional) 38, 43, 51, 56, 66, 72, 81, 91
Quantum Hall plateau 76
Quantum Hall regime 323, 361
Quantum Hall state (fractional) 86
Quantum dot 378, 385, 394
Quantum limit 123, 250
Quantum well 115, 159, 289, 417
Quantum wire 21, 86, 341, 351, 355, 361, 365, 369
Quasi-ballistic transport 351

Random-matrix model 306
Recent trends 526
Reflectivity 455
Residual magnetization 522
Resonant magnetotunneling spectroscopy 285
Resonant tunneling 241, 254, 254
Resonant-tunneling structure 263
Resonating interband transition 259
Roton 100

Saw-tooth waveform 508
ScErAs 232
Scaling 72
Scaling analysis 26
Semiconductor 526
Semimagnetic semiconductor 451, 460
Semimetal-to-semiconductor transition 268
Shallow donor state 409
Short-period superlattice 111
Shubnikov–de Haas effect 184, 206, 432
Shubnikov–de Haas oscillation 192, 211, 226, 229, 232
Shubnikov–de Haas resistance 21
Si 141, 374
SiC 178
Si-MOSFETs 323
Single-electron tunneling 378
sp–d exchange constant 441
sp–d exchange interaction 460
Spin density wave 470, 481, 498
Spin metal gate 351
Spin splitting 76, 149
Spin–orbit scattering 355
Spin-1/2 electron 91
Spin-polarization instability 76
Spin-polarized energy level 81
Stark ladder 277, 310
Stimulated emission 123
Strained layer 154
Strained layer system 106
Strained-layer superlattice 184
Stress components 513
Stripline 465
Subband population 221
Superconductivity 337
Superlattice 246, 277, 455
Symmetric/antisymmetric state 91

$(TMTSF)_2ClO_4$ 481
$(TMTSF)_2X$ 503
Theory 26, 30, 34, 66, 86, 91, 115, 197, 289, 306, 310, 318, 337, 355, 361, 365, 385, 394, 417, 481, 498, 503
Three-dimensional periodic potential 30
Tight-binding model 310
Tilted magnetic field 76, 318
Tomonaga–Luttinger liquid state 86
Transmission coefficient 365
Transport 216
Transport measurement 95
Transport phenomena 355
Triangular quantum well 318
Triple-layer electron system 43
Triplet state 417
Tunnel capacitor 378
Two-dimensional disordered electron system 306
Two-dimensional electron gas 398
Two-dimensional electron system 51, 66, 86, 314, 337, 508
Two-dimensional exciton system 119
Two-dimensional hole gas 95
Two-dimensional quantum solid 66
Two-dimensional system 149
Two-quantum-point contact 34
Type-II superconductor 522
Type-I–type-II transition 111
θ-$(BEDT\text{–}TTF)_2I_3$ 508

Ultra-quantum limit 149
Ultrametric space 503
Universal conductance fluctuation 341, 374
Universality 361

Valence band 154
Vortex-lattice state 337

Wide parabolic well 43
Widom–Streda formula 30
Wigner crystal 66, 385
Wigner solid 38, 56, 95, 149

Zeeman effect 137
Zeeman energy 81
Zeeman splitting 422
Zero gap 168
Zero-gap semimagnetic semiconductor 465
Zero-phonon line 137
ZnSe 141
